SUBJECT: Federally Required Annual Certification of Local Match for Medicaid Reimbursement Statement

---

Medicaid is a health care assistance program for the poor, elderly and disabled that is jointly funded by the State and federal government. The State share is based on its percentage of unemployed and its per capita income relative to other states. The State of New Hampshire must match each dollar the federal government pays towards Medicaid medical services rendered. Currently, this match represents fifty percent (50%) of the Medicaid program expenditures.

Federal regulations allow states to use state general funds or other non-federal governmental funding sources – such as local or county funds – to be used as “state match”. To prove that this match is being made, each SAU must document that the SAU has provided at least 50% of the cost of services reimbursed by Medicaid, as required under He-W 589.08, Medical Assistance provided by Educational Agencies. The attached form “Documentation of Expenditure of Non-Federal Funds” is to be used to comply with federal documentation requirements.

Each year, the Department of Health and Human Services (DHHS) sends this reminder notice to all participating SAUs indicating that the Match for Medicaid funds form is due. The due date this year is October 31st. The form covers local match to Medicaid funds **paid** during a specific July 1 through June 30 time period **regardless of dates of service**, that is, enter figures based on what you have actually received during this period. SAUs must enter data for each of their enrolled districts that were paid Medicaid funds. The district’s “match” payment total (far right column on the form) should always be at least equal to or greater than the Medicaid payment column (middle) since the system automatically pays 50% of the actual cost billed or 50% of the rate established by the Department whichever is less.

**DOCUMENTATION OF EXPENDITURE OF NON-FEDERAL FUNDS**

CLAIMS PAID FROM July 1, 2023 to June 30, 2024

Medicaid is a federal health care assistance program for the poor, elderly and disabled that is jointly funded by state and federal governments. The state share is based on its percentage of unemployed and its per capita income relative to other states. The State of New Hampshire currently must match each dollar the federal government pays on behalf of Medicaid services. Consequently, New Hampshire must fund fifty percent (50%) of the Medicaid Program. Federal regulations allow states to use state general funds or other non-federal governmental funding sources - such as local or county funds - to be used as “state match”. To prove that this match is being made, each SAU must document the level of local funding that is being applied to match the federal funding. The following sheet can be used to comply with federal documentation requirements.
